

AEP 2014 SUSTAINABILITY SURVEY OF COAL SUPPLIERS PERFORMANCE SUMMARY

Figures are based on the number of respondents to 2014 Survey

100%

of suppliers
have formal
environmental
programs

Responding mines production:

346

million tons
of coal produced from
surface operation mining

57.5

million tons
of coal produced
by underground mining

50%

of respondents produce
sustainability reports — up from
14% in 2009

Most anticipated post- mining land use:

55%

Agriculture

32%

Forestland/Fish/
Wildlife

13%

Other

54 million tons

of coal delivered to AEP in 2013

Respondents produced
approximately

40%

of the total
coal mined in the U.S.

100

percent

offer safety
training beyond
compliance

85%

of suppliers
had zero
water quality
violations
